VERO IS AN OLD, OLD TOWN

—
Scientists Have Discovered That
Men Lived There 125,000
Years Ago
—

Chicago, Dec. 23.—Human beings inhabited North America one hundred and twenty-five thousand years ago, according to the findings of E. H. Sellards, Florida state geologist and Prof. Oliver P. Hay, made public, today, as a result of the study of fossil remains discovered at Vero, Florida, some months ago.

It is said that human bones were found intermingled with those of the mastodon, saber toothed tiger and other extinct animals.
